The utility meme coin

**Overview**

- **AUTOMATE YOUR CARBON OFFSETTING REAL TIME** Introducing the *XR589 clamp meter*, real world application of cryptocurrency utility! The XR589 clamps onto your power cable or mains power outlet, where a combination of user input settings and self-calibration allows the XR589 to monitor your power consumption in real time and then *offset* your power consumption by automatically sending cryptocurrency to one of Xrdoge’s “carbon offset” partners. Configured via Wifi connection to your local network with a full suite of options.

**XRDOGE Clamp Meter – XR589 power clamp meter.**

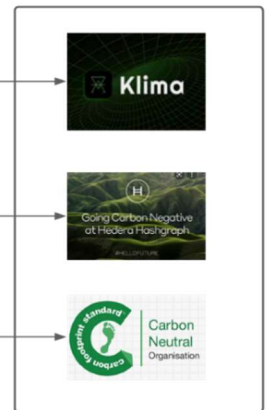

**FEATURES**

LCD display real time power consumption.

AC 2500 amps capability.  
2000 ohm resistance range.

Integrated SBC to handle ADC, user input settings, data storage and transactions.

Wifi enabled for programming.

Power usage measured by XR-589 and then XRdoge is transferred via cross-chain swap or directly to your chosen “carbon offset” project/partner.

<b>Model number</b>	XR589
<b>Clamp meter type</b>	Passive AC voltage and current measurement
<b>Power</b>	Local Li-ion battery / passive via mutual inductance.
<b>WIFI</b>	802.11n
<b>User input</b>	Wifi via android/IOS app / push buttons on touchscreen
<b>Display</b>	LCD
